HGP Falsification Scorecard — Auto Report (v4)

Generated from /docs/HGP_Falsification_Scorecard.csv. Fill PassFail/EvidenceLink/Notes and regenerate.

Status summary

Passed: 0 • Failed: 0 • Partial/Pending: 0 • Unset: 9

Gate	Criterion	PassFail	EvidenceLink	Notes
G0	Instrument sanity (calibration, saturation, metadata)	nan	nan	nan
G1	Null equivalence under blinding	nan	nan	nan
G2	Polarity flips + wiring/ground topology swaps do not explain effect	nan	nan	nan
G3	Environment confounds recorded + regressed (temp/humidity/EMI)	nan	nan	nan
G4	Independent replication (same protocol, comparable effect)	nan	nan	nan
G5	Optional: strict energy accounting excludes conventional sources	nan	nan	nan
B1	Bayes factor computed with declared priors; sensitivity analysis done	nan	nan	nan
B2	Model comparison favors anomaly model across reasonable priors	nan	nan	nan
R1	Full raw data + scripts archived immutably	nan	nan	nan

Guidance

- EvidenceLink should point to immutable artifacts: raw-data hash, plots, log files, scripts, PDF notes.
- Do not advance gates without evidence. If in doubt, mark as Pending and add a note. - Bayesian gates (B1/B2) require reporting sensitivity over priors (see /docs/11_PRIOR_SENSITIVITY.md).
